

# Restoration News

Iowa Army Ammunition Plant Quarterly Restoration Newsletter

## Closing the Communication Gap— Restoration News

Do you remember the name of the last newsletter? The Restoration Pilar was published monthly for three years, ending in July 2007. To keep the Restoration Advisory Board (RAB) and the public better informed, bringing back a newsletter will help close the communication

gap between IAAAP restoration and you. *Restoration News* will be published quarterly just in time for each RAB meeting; January, April, July & October. We would appreciate your input and feedback.

## IAAAP Awards New Contract

Effective June 2016—September 2021, IAAAP has awarded an installation-wide contract to CH2M-Hill. This contract covers a broad-spectrum of environmental services. These services include, but are not limited to, site investigation, remedial investigation to determine the nature and extent of contamination, ecological and human health risk assessments, feasibility studies, proposed plans, and records of decisions (RODs) associated with contaminated sites at IAAAP. The overall goal of this contract is to prepare amendments to finalize the RODs for Operable Unit 1 (OU1) - Soils, OU3 (Off-site Groundwater), OU4 (Inert Disposal Area) and achieve final decision documents for OU6 (On-site Groundwater), OU7 (Installation-Wide Miscellaneous Areas) and OU9 (Construction Debris Sites) by performing a site wide remedial investigation. These OUs are interrelated and correlated due to the interaction of surface water, soil, and groundwater within the same aquifer and watershed across the entire IAAAP installation. CH2M will provide updates of their progress at quarterly RAB meetings.

## Wounded Warrior Hunt

IAAAP is hosting the Annual Iowa Fish and Game Conservation Officers Association Wounded Warrior Hunt October 18 & 19, 2016.

Iowa Army Ammunition Plant will ensure on-site hunting opportunities to hunters utilizing wheelchairs.

It is general policy of the IAAAP recreational program "to maximize the opportunity for hunting and fishing on the installation, consistent with mission requirements and sound environmental and natural resources management practices," according to IAAAP Regulation 420-1.

To support the Iowa Fish and Game Conservation Officers Association Wounded Warrior hunts, contact Paul C. Kay, DNR Conservation Officer, P.O. Box 27, Burlington, IA 52601 or 319-759-0751.

Learn more about the Wounded Warriors project at [www.woundedwarriorproject.org](http://www.woundedwarriorproject.org).

## Commander's Corner

I am excited to announce that the Plant has broken ground to construct a new chemistry laboratory. This significant investment by the Army will support not only our munitions production mission, but will also support our environmental restoration and compliance efforts. Modernized lab equipment will allow the plant to monitor environmental hazards more accurately and respond more quickly by eliminating the need to send samples to an off-site lab for testing.

The construction project is expected to be complete by Autumn 2017.

## Did You Know?

IAAAP has 88 restoration sites throughout the 19,000 acre installation.

## New Website— [www.iaaprestoration.com](http://www.iaaprestoration.com)

New and improved website now combines the RAB website and the Administrative Record site into one site—IAAAP Environmental Restoration website. Don't worry, if you don't have online access or don't want anything to do with the internet, this newsletter is your key. Each issue will have the Commander's Corner, a "Did You Know?" section and of course information on IAAAP's Environmental Restoration or clean-up status. Who said environmental clean-up isn't fun and exciting?
