Restoration Status
Believe it or not, there is much more happening behind the scenes than the building demo. As we approach winter, field activities slow, but the Installation-wide Remedial Investigation is wrapping up with data slowly trickling in from the labs. Once the Army receives the internal draft, reviewing by the team begins. Operable Unit 1 (Soils) is close to finalizing Land Use Controls and the FY19 Operable Unit 3 (Off-site Groundwater) Annual Monitoring Report is also close to becoming final. There are approximately eight documents currently being reviewed by either the Army or the EPA. The Five-Year Review and Program Review will be starting soon. Stay tuned for more info coming to a RAB near you!

2019 Wounded Warrior Hunt
On October 15 and 16, 2019, the Iowa Army Ammunition Plant (IAAAP), along with the Iowa Department of Natural Resources (IDNR), conducted a Wounded Warrior Deer Hunt. Four Wounded Warriors participated in the hunt, with one of the four being successful harvesting one buck (pictured below). The Department of the Army and the State of Iowa take pride in their support for America’s Wounded Warriors.

Below: IAAAP staff, IDNR staff, and the 2019 Wounded Warrior Participants.

Commander’s Corner

A year ago, the Army published the new operating concept The U.S. Army In Multi-Domain Operations 2028. The concept describes how the Army, as part of the Joint Force, will operate across the continuum of competition to conflict. A key component of the Army’s ability to fight is the work done here at the IAAAP in support of Joint Munitions Command’s vision, Providing Lethality That Wins! We remain at the forefront as new capabilities are developed for the future force today.

Since assuming command in June, I have the daily opportunity to witness the hard work and dedication of the entire team that makes up the IAAAP. Day in and day out, their efforts and the support of the local community ensure that quality munitions are ready and available for the Warfighter.

No small part of this effort is to assure that the work undertaken is environmentally sound. Our environmental and restorative staff are among the best in their fields and spend countless hours assuring that IAAAP operations meet our responsibilities. Whether addressing challenges of the past or modernizing for the future, I have the utmost confidence that as a team, we will achieve the mission.

IOWA ARMY AMMUNITION PLANT

Environmental Restoration
17571 DMC Highway 79
Middletown, IA 52638-5000

Restoration News is an unofficial publication sent quarterly to inform the public of on-going and upcoming restoration events at the Iowa Army Ammunition Plant. Contents of Restoration News are unofficial and are not necessarily endorsed by the Joint Munitions and Lethality Life Cycle Management Command, the Department of the Army, the Department of Defense, or any other U.S. Government agency.

This publication is edited by Mrs. Sarah Brockway, American Ordnance LLC.
