FUSRAP Shipping Campaign FY20 Has Rolled Out

The FY20 Formerly Utilized Sites Remedial Action Program (FUSRAP) Shipping Campaign completed earlier than planned. Depleted Uranium (DU) contaminated soils from Firing Site 12 were excavated and processed/sorted then hauled to M Yard. 2,028 cubic yards (cy) of contaminated soils filled 25 rail cars which were hauled for disposal in Idaho.

Tree chipping at Firing Site 12 is to begin January 2020 to support excavation and processing that is planned for 2020 and 2021.

### Total Funded to Date:

- Facilities: 424
- SQFT: 830,743

### PHASE 9 Planning Phase (Line 3A):

- Facilities: 52
- SQFT: 253,081

### Total Scheduled:

- Facilities: 476
- SQFT: 1,083,824

### Progress

- 24.88 Acres
Commander’s Corner

After seven months in command, I have visited virtually every area of production and installation support here at the plant. The dedicated IAAAP Team continues to operate at a high level and deliver world-class munitions to the Warfighter.

Ongoing restoration efforts continue to yield results. Most recently, the well-organized and efficient FUSRAP Shipping Campaign removed 25 lined and secured rail cars of material from the installation. This campaign was completed well ahead of schedule.

The IAAAP has a bright future ahead of it as we continue to modernize. No small part of this effort, is the continued demolition of old infrastructure which further aids in the removal of potential sources of ground contamination.

I look forward to what 2020 has in store as we continue to maintain momentum as a world-class munition plant.

Did You Know?
The IAAAP Administrative Record, required by the Code of Federal Regulations, is a compilation of documents that track the discovery, investigation, and remedy selection for environmental clean-up activities. It also provides a mechanism for public participation. The documents contained in the Administrative Record were used as the basis for the selection of a response action. Did you also know that the IAAAP Administrative Record is available to view online?
